

FOR AGENCIES THAT DROWN IN CLIENT MESSAGES

Stop typing. Start shipping.

Your clients message you all day. Voice notes. Texts. Mid-conversation requests. Someone on your team has to translate every single one into a task. Hours, gone.

Client speaks → AI listens → task appears in ClickUp → assistant ships the work.

9s VOICE TO TASK	0 COPY-PASTE	100% HUMAN REPLIES
--	------------------------------------	--

WHY YOU'LL CARE

Three quiet superpowers.

0 1

Conversations stay human

Replies are typed by your assistants like normal. The AI never talks to your clients. The warmth stays.

0 2

Nothing slips through

Every actionable request becomes a tracked task with deadline, priority, and assignee. Forgetting is no longer possible.

0 3

Your team gets time back

1.5–2 hours of admin reclaimed daily, per assistant. Spent on actual creative work, not transcription.

HOW WE BUILD IT

Live in 4 weeks. No code. No headcount.

WEEK 1

Foundations

Set up ClickUp. Apply for WhatsApp Business. Connect OpenAI.

WEEK 2

Wire it up

Build the Make.com automation. Test with text messages first.

WEEK 3

Add voice

Plug in transcription. Tune the AI for your tone and language.

WEEK 4

Roll out

Onboard one client. Refine. Then everyone.

READY TO STOP TYPING?

Let's build yours in 4 weeks.
